## SUMMARY

Passionate DevOps Engineer adept at optimizing development workflows and improving operational efficacy. Recent graduate skilled in software development, system administration, and cloud technologies. Excited to leverage theoretical expertise and hands-on experience to enhance software delivery in collaborative environments.

---

## WORK EXPERIENCE

### Eng. Digitization & PLM Analyst | Accenture

Jan 2021- Present

- - Configured, managed, and maintained Teamcenter systems to ensure optimal performance and reliability.
  - - Provided technical support to end-users, addressing and resolving Teamcenter-related issues promptly.
  - - Conducted user training sessions to enhance system utilization and efficiency.
  - - Customized Teamcenter configurations to meet unique business requirements and workflows.
  - - Integrated Teamcenter with CAD software and other enterprise systems for seamless data exchange.
  - - Implemented access controls and data integrity measures within Teamcenter to safeguard sensitive information.
  - - Generated comprehensive reports on system performance, user activity, and support ticket metrics.
- 

## PROJECTS

### • Create a complete CI-CD pipeline using bash, python and crontabs.

Implemented an end-to-end Continuous Integration and Continuous Deployment (CI/CD) pipeline utilizing bash, Python, and crontabs, ensuring seamless automation of code deployment from GitHub to an Nginx server.

---

## EDUCATION

### B. E in Mechanical Engineering

RNS INSTITUTE OF TECHNOLOGY

Aug 2016 - Sep 2020

### Class 12 - Pre-University

MES Kishore Kendra

Aug 2015 - Aug 2019

---

## SKILLS

- Languages: Python
- Developer Tools: Jira
- Cloud/IAAC: AWS
- Databases: MongoDB
- Other: Jenkins
