A Java Developer with background in Spring Boot Microservices. Leveraging my expertise in building real world applications and contributing towards innovative software solutions. Open for learn and collaborate to drive innovation with reliable and faster solutions.

Education

2017-2021   **8.15 CGPA**

Bachelor of Technology

Guru Gobind Singh Indraprastha University, Delhi

2016-2017   **89%**

Higher Secondary School - Class 12th

CBSE, Delhi

Experience

2021 - PRESENT

Custom Software Engineering Analyst

Accenture, Gurugram

- Developing RESTful APIs using SpringBoot with the current Industry Standards.
- Supporting Managing multiple micro-services and ensuring 100% up-time and can handle variable traffic as per business requirements.
- Working as software detectives, providing solutions, identifying and solving issues within multiple components of critical business systems.
- Building and maintaining Code pipelines for effortless and faster solution delivery.
- Practicing Agile and DevOps culture throughout the organization.
- Developing and Maintaining SOP for the ease and smooth functioning of Business Processes.

Project

- Developing Spring Boot and Spring Cloud Application which can handle variable traffic through Auto Scaling and handles a peak load of 3-4k traffic/hr having logging functionality and default time to respond with proper error handling.
- Deploying the Application in multiple environments to enable testing and code versioning.
- Building a central configuration service using Spring Config which communicates with different Services/Apps for enabling and fetching common configuration.

Skills

- Java
- Git & GitHub
- Spring Boot & Spring Cloud
- JPA & Hibernate
- React
- MongoDB
- JavaScript

- NodeJS & ExpressJS
- Python
- HTML & CSS
- SQL
- Agile Development
